

This is the splash screen a clean entry point where users can sign up or log in before accessing the app

The home screen gives quick access to essential features like sending money, checking balance, scanning QR codes, and viewing cards. It's designed for simplicity and speed.

This screen shows spending insights and transaction history. Users can track how much they've spent over the week and see details of each payment.

Here's the payment confirmation screen. It clearly displays the recipient and amount, with a secure swipe-to-pay interaction to finalize the transaction.
